BX 36/36E Micro PLC Units (MPUs) Overview

The BX 36/36E Micro PLC Unit (MPU) includes fourteen different versions. All have the same appearance and basic features. All units have 20 discrete input points and 16 discrete output points built-in. Units with DC inputs have 10 selectable high-speed inputs and units with DC outputs have 8 selectable high-speed outputs. All MPUs can expand their capacity with the BRX Expansion Modules to allow for more flexibility while keeping control cost down. BX 36E units have an Ethernet port as well as an additional 4 analog inputs and 2 analog outputs built-in that are current/voltage selectable within the software.

The units ship without wiring terminals. This allows you to select the termination type that best fits your application. There are several wiring options available, including screw terminal connectors, spring clamp terminal connectors and pre-wired *ZIPLink* cable solutions.

BX 36/36E MPUs are divided into two distinct groups, BX 36 and BX 36E. The BX 36 MPUs have no built-in analog I/O or Ethernet port. The BX 36E MPUs have all the features of the BX 36, plus built-in analog I/O and an Ethernet port.

BX 36 Micro PLC Unit (MPU)
(No Built-in Analog or Ethernet Port)

BX 36E Micro PLC Unit (MPU)
(Built-in Analog and Ethernet Port)

BX 36 MPUs General Specifications

BX 36 Micro PLC Unit (MPU)
(No Built-in Analog or Ethernet port)

- 36 discrete I/O points: 20 input, 16 output
- No built-in analog I/O points
- Models with DC inputs:
 - have 10 high-speed inputs rated up to 250kHz
 - accept 12–24 nominal voltage, AC or DC
 - can be wired as sinking or sourcing
- Models with AC inputs can accept 120–240 nominal voltages
- Output types available are DC sinking, DC sourcing, and relay
- Models with DC outputs have 8 high-speed outputs rated up to 250kHz
- Support for up to 8 additional Expansion Modules as long as the power budget is not exceeded.

The following table shows the available BX 36 MPUs.

BX 36 MPUs				
Part Number	External Power	Discrete Input	Discrete Output	Expansion Modules
BX-DM1-36ED1	120–240 VAC	10 High-speed 10 Standard DC Sinking or Sourcing	8 High-speed 8 Standard DC Sinking	8, as long as the MPU power budget is not exceeded
BX-DM1-36ED1-D	12–24 VDC		8 High-speed 8 Standard DC Sourcing	
BX-DM1-36ED2	120–240 VAC		16 Form A Relay	
BX-DM1-36ED2-D	12–24 VDC			
BX-DM1-36ER	120–240 VAC	20 AC		
BX-DM1-36ER-D	12–24 VDC			
BX-DM1-36AR	120–240 VAC			

BX 36E MPUs General Specifications

BX 36E Micro PLC Unit (MPU)
(Built-in Analog and Ethernet Port)

- 36 Discrete I/O points: 20 inputs, 16 outputs
- All units have 4 analog input and 2 analog output (current/voltage software selectable)
- All units have built-in Ethernet port, 10/100 Mbps
- Models with DC inputs:
 - have 10 high-speed inputs rated up to 250kHz
 - accept 12–24 nominal voltages, AC or DC
 - can be wired as sinking or sourcing
- Models with AC inputs can accept 120–240 nominal voltages
- Output types available are DC sinking, DC sourcing, and relay
- Models with DC outputs have 8 high-speed outputs rated up to 250kHz
- Support for 8 additional Expansion Modules

The following table shows the available BX 36E MPUs.

BX 36E MPUs						
Part Number	External Power	Discrete Inputs	Discrete Output	Analog *		Expansion Modules
				Input	Output	
BX-DM1E-36ED13	120–240 VAC	10 High-speed 10 Standard DC Sinking or Sourcing	8 High-Speed 8 Standard DC Sinking	4 Current or Voltage	2 Current or Voltage	8
BX-DM1E-36ED13-D	12–24 VDC					
BX-DM1E-36ED23	120–240 VAC		8 High-Speed 8 Standard DC Sourcing			
BX-DM1E-36ED23-D	12–24 VDC					
BX-DM1E-36ER3	120–240 VAC		16 Form A Relay			
BX-DM1E-36ER3-D	12–24 VDC					
BX-DM1E-36AR3	120–240 VAC	20 Standard AC				

* Analog can be current or voltage software selectable per channel.

BX 36/36E MPU Wiring Termination Selection

The BX 36/36E MPUs ship without terminal blocks. This allows you to select the termination type that best suits your application. There are several removable terminal block options available, including screw terminals, spring clamp terminals, as well as pre-wired *ZIPLink* module and cable solutions.

Terminal Block Connectors

The terminal block connectors are provided in kits and can be easily ordered as a single part number. Each kit contains the required number of terminal blocks: (12) 5-pin 5mm terminal blocks.

The BX 36/36E MPUs terminals are configured into groups consisting of 4 inputs and 4 outputs each with an isolated common, e.g., inputs X0–X3 are grouped with a common terminal. The groups are isolated such that a single 5-pin connector can be removed without affecting another group of I/O or the external power source.

The terminal block connector kit part numbers and connector specifications are listed in the table below.

Removable Terminal Block Connector Specifications		
Kit Part Number	BX-RTB36	BX-RTB36-1
Connector Type	Screw Type-90 degree	Spring Clamp Type-180 degree
Wire Exit	180 degree	180 degree
Pitch	5.0 mm	5.0 mm
Screw Size	M2.5	N/A
Recommended Screw Torque	< 3.98 lb·in (0.45 N·m)	N/A
Screwdriver Blade Width	3.5 mm	3.5 mm
Wire Gauge (Single Wire)	28–12 AWG	28–14 AWG
Wire Gauge (Dual Wire)	28–16 AWG	28–16 AWG (Dual wire ferrule required)
Wire Strip Length	0.3 in (7.5 mm)	0.37 in (9.5 mm)
Equiv. Dinkle P/N	5ESDV-05P-BK	5ESDSR-05P-BK

BX-RTB36 Screw Terminal Block Kit

This terminal block kit has 12, 90 degree screw terminal blocks with 180 degree wire pass through.

5-Pin

BX-RTB36-1 Spring Terminal Block Kit

This terminal block kit has 12, Spring Clamp wire terminal blocks with 180 degree wire pass through.

5-Pin

Replacement terminal blocks can be ordered online at: www.AutomationDirect.com. Single replacement terminal blocks are listed in table below.

Replacement Terminal Blocks		
	BX-RTB36	BX-RTB36-1
5-pin	BX-RTB05	BX-RTB05-1

ZIPLink Prewired Cable Solutions

ZIPLinks eliminate the normally tedious process of wiring between devices by utilizing prewired cables and DIN rail mount connector modules. ZIPLinks are as simple as plugging in a cable connector at either end or terminating wires at only one end. Pre-wired cables keep installation clean and efficient, using less space at a fraction of the cost of standard terminal blocks. ZIPLink pre-wired cables connect directly from the MPU to a ZIPLink remote terminal block module or with the pigtail cable option, that allows for a convenient solution to wire the BRX platform to third-party devices. For the BX 36/36E MPUs, four (4) cables and four (4) ZIPLink feedthrough modules are needed to connect all the wiring termination points.

There are two (2) feedthrough module options available, the ZL-RTB20 and the ZL-RTB20-1. The ZL-RTB20 is a standard feedthrough remote terminal module while the ZL-RTB20-1 is a feedthrough remote terminal block having a more compact footprint, requiring less space in the control cabinet.

The table below lists the ZIPLink system options for the BX 36/36E MPUs.

BX 36/36E ZIPLink Selector					
Part No.	Component Type	Module Part No.	Max Qty Needed	Cable Part No.*	Max Qty Needed
BX-DM1-36ED1	Feedthrough	ZL-RTB20 (Standard) -OR- ZL-RTB20-1 (Compact)	4	ZL-BX-CBL15 ZL-BX-CBL15-1 ZL-BX-CBL15-2	4
BX-DM1-36ED1-D					
BX-DM1-36ED2					
BX-DM1-36ED2-D					
BX-DM1-36ER					
BX-DM1-36ER-D					
BX-DM1-36AR					
BX-DM1E-36ED13					
BX-DM1E-36ED13-D					
BX-DM1E-36ED23					
BX-DM1E-36ED23-D					
BX-DM1E-36ER3					
BX-DM1E-36ER3-D					
BX-DM1E-36AR3					

* Select the cable length: Blank = 0.5 m, -1 = 1.0 m, -2 = 2.0 m.
Available pigtail cables: ZL-BX-CBL15-1P = 1.0 m, ZL-BX-CBL15-2P = 2.0 m.

ZIPLink Prewired Cables

Custom molded **ZIPLink** prewired cables allow for fast and easy connection of field wiring and remote I/O to the BRX platform. The prewired cables are available in 0.5 meter, 1 meter and 2 meter lengths. Pigtail cables are used to connect the BRX platform directly to third-party devices, lowering your wiring cost and time. The pigtail cables are available in 1 meter and 2 meter lengths.

ZL-BX-CBL20
ZIPLink Prewired Cable

ZL-BX-CBL20-1P
ZIPLink Pigtail Cable

ZIPLink Remote Feedthrough Modules

Feedthrough modules provide low-cost and compact field wiring screw termination solutions for quickly connecting with the BRX platform. There are two (2) modules available for use with the BRX platform. The ZL-RTB20 and the ZL-RTB20-1. The ZL-RTB20 is a standard 2-row, 20-pin, DIN rail mountable feedthrough module. The ZL-RTB20-1 is a compact 3-row, 24-pin, DIN rail mountable feedthrough module with a smaller footprint design.

The **ZIPLink** remote feedthrough module specifications are listed in the table below.

ZIPLink Module Specifications		
Part Number	ZL-RTB20 (Maximum of 4 Needed)	ZL-RTB20-1 (Maximum of 4 Needed)
Number of positions	20 screw terminals, 2 rows	24 screw terminals, 3 rows
Screwdriver Width	1/8 in (3.8 mm) maximum	
Screw Torque	4.4 lb·in (0.5 N·m)	

ZL-RTB20

ZL-RTB20-1

ZIPLink System Examples

BX 36 MPU with *ZIPLink* pre-wired cables and ZL-RTB20 feedthrough modules.

BX 36 MPU with *ZIPLink* pigtail cables installed.

BX 36 Micro PLC Units (MPUs)

BX-DM1-36ED1 Wiring

This MPU is made up of 36 discrete I/O points. The connections are grouped as follows:

- 20 discrete inputs - sinking/sourcing; rated for 12–24 VAC/VDC. They are located along the bottom of the unit; configured in five (5) groups of 5 terminals, each comprised of 5 inputs and an isolated common.
- 16 discrete outputs - sinking; rated at 12–24 VDC. They are located along the top of the unit starting to the right of the 24VDC auxiliary output terminals. The outputs are configured in four (4) groups of 5 terminals, each comprised of 4 outputs and an isolated common.

This MPU requires an external 120–240 VAC power supply. The AC power supply connection and the 24VDC auxiliary output supply terminals are located on the top left side of the unit.

WARNING: No analog I/O is included on this unit. The 5 terminals to the right of the input and output rails are not used. These terminals are not internally connected. DO NOT CONNECT ANYTHING TO THESE TERMINALS!

BX-DM1-36ED1

NOTE: Four (4) Expansion Modules can be connected to extend I/O capacity.

1. All outputs may be used as standard outputs. Only the first 8 outputs (Y0...Y7) are capable of high-speed DC operation.

2. When the high-speed outputs are in an overcurrent situation, the Common terminal Red LED is on. The output LEDs will remain operational even though the output circuitry is turned off and no power is flowing. This condition is not reported to the CPU.

BX-DM1-36ED2-D Wiring

This MPU is made up of 36 discrete I/O points. The connections are grouped as follows:

- 20 discrete inputs - sinking/sourcing; rated for 12–24 VAC/VDC. They are located along the bottom of the unit; configured in five (5) groups of 5 terminals, each comprised of 4 inputs and an isolated common.
- 16 discrete outputs - sourcing; rated at 12–24 VDC. They are located along the top of the unit starting to the right of the 24VDC external power supply terminals. The outputs are configured in four (4) groups of 5 terminals, each comprised of 4 outputs and an isolated common.

This MPU requires an external 12–24 VDC power supply. The DC power supply connection is located on the top left side of the unit. There is no 24VDC auxiliary output supply.

WARNING: No analog I/O is included on this unit. The 5 terminals to the right of the input and output rails are not used. These terminals are not internally connected. DO NOT CONNECT ANYTHING TO THESE TERMINALS!

BX-DM1-36ED2-D

NOTE: Eight (8) Expansion Modules can be connected to extend I/O capacity, as long as the MPU power budget is not exceeded.

BX-DM1E-36ED13 Wiring

This MPU is made up of 36 discrete I/O points. The connections are grouped as follows:

- 20 discrete inputs - sinking/sourcing; rated for 12–24 VAC/VDC. They are located along the bottom of the unit; configured in five (5) groups of 5 terminals, each comprised of 4 inputs and an isolated common.
- 16 discrete outputs - sinking; rated at 12–24 VDC. They are located along the top of the unit starting to the right of the 24VDC auxiliary output terminals. The outputs are configured in four (4) groups of 5 terminals, each comprised of 4 outputs and an isolated common.
- 4 analog inputs and 2 analog outputs. The analog inputs are located along the bottom of the unit to the right of the discrete inputs. The analog inputs are grouped together on 5 terminals consisting of 4 input and a shared analog input common. The analog outputs are located along the top of the unit to the right of the discrete outputs. The analog outputs are grouped together on 5 terminals consisting of 2 outputs and 3 shared analog output common terminals. The analogs share these common features:
 - current or voltage selectable through software
 - 16-bit resolution @ $\pm 20\text{mA}$, $\pm 10\text{VDC}$
 - current signal ranges of 4–20 mA, $\pm 20\text{mA}$
 - voltage signal ranges of 0–5 VDC, 0–10 VDC, $\pm 5\text{VDC}$, $\pm 10\text{VDC}$.

This MPU requires an external 120–240 VAC power supply. The AC power supply connection and the 24VDC auxiliary output supply terminals are located on the top left side of the unit.

NOTE: An Edison S500-32-R 0.032A fast-acting fuse is recommended for all analog voltage inputs, analog outputs, and current loops.

BX-DM1E-36ED13-D Wiring

This MPU is made up of 36 discrete I/O points. The connections are grouped as follows:

- 20 discrete inputs - sinking/sourcing; rated for 12–24 VAC/VDC. They are located along the bottom of the unit; configured in five (5) groups of 5 terminals, each comprised of 4 inputs and an isolated common.
- 16 discrete outputs - sinking; rated at 12–24 VDC. They are located along the top of the unit starting to the right of the 24VDC external power supply terminals. The outputs are configured in four (4) groups of five (5) terminals, each comprised of four (4) outputs and an isolated common.
- 4 analog inputs and 2 analog outputs. The analog inputs are located along the bottom of the unit to the right of the discrete inputs. The analog inputs are grouped together on 5 terminals consisting of 4 input and a shared analog input common. The analog outputs are located along the top of the unit to the right of the discrete outputs. The analog outputs are grouped together on 5 terminals consisting of 2 outputs and 3 shared analog output common terminals. The analogs share these common features:
 - current or voltage selectable through software,
 - 16-bit resolution @ ± 20 mA, ± 10 VDC
 - current signal ranges of 4–20 mA, ± 20 mA,
 - voltage signal ranges of 0–5 VDC, 0–10 VDC, ± 5 VDC, ± 10 VDC.

This MPU requires an external 12–24 VDC power supply. The DC power supply connection is located on the top left side of the unit. There is no 24VDC auxiliary output supply.

BX-DM1E-36ED13-D

NOTE: Eight (8) Expansion Modules can be connected to extend I/O capacity.

Analog Output Wiring

NOTE: An Edison S500-32-R 0.032A fast-acting fuse is recommended for all analog voltage inputs, analog outputs, and current loops.

BX-DM1E-36ER3 Wiring

This MPU is made up of 36 discrete I/O points. The connections are grouped as follows:

- 20 discrete inputs - sinking/sourcing; rated for 12–24 VAC/VDC. They are located along the bottom of the unit; configured in five (5) groups of 5 terminals, each comprised of 4 inputs and an isolated common.
- 16 discrete outputs - Form A Relay (SPST); rated 12–48 VDC/ 24–240 VAC. They are located along the top of the unit starting to the right of the 24VDC auxiliary output terminals. The outputs are configured in four (4) groups of 5 terminals, each comprised of 4 outputs and an isolated common.
- 4 analog inputs and 2 analog outputs. The analog inputs are located along the bottom of the unit to the right of the discrete inputs. The analog inputs are grouped together on 5 terminals consisting of 4 input and a shared analog input common. The analog outputs are located along the top of the unit to the right of the discrete outputs. The analog outputs are grouped together on 5 terminals consisting of 2 outputs and 3 shared analog output common terminals. The analogs share these common features:
 - current or voltage selectable through software,
 - 16-bit resolution @ $\pm 20\text{mA}$, $\pm 10\text{VDC}$
 - current signal ranges of 4–20 mA, $\pm 20\text{mA}$,
 - voltage signal ranges of 0–5 VDC, 0–10 VDC, ± 5 VDC, $\pm 10\text{VDC}$.

This MPU requires an external 120–240 VAC power supply. The AC power supply connection and the 24VDC auxiliary output supply terminals are located on the top left side of the unit.

BX-DM1E-36ER3

NOTE: Eight (8) Expansion Modules can be connected to extend I/O capacity.

Full Scale Calibration Error	0.05% of Full Hardware Range = 33 Counts
Offset Calibration Error	0.01% of Full Hardware Range = 7 Counts
Accuracy vs Temperature Error	0.05% of Full Hardware Range = 33 Counts
Maximum Linearity Error (End to End)	0.1% of Full Hardware Range = 66 Counts
Maximum Inaccuracy	0.2% of Full Hardware Range = 131 Counts
Fuse Type	User-supplied external fuse

* Software selectable per channel

Analog Output Connection Options

NOTE: An Edison S500-32-R 0.032A fast-acting fuse is recommended for all analog voltage inputs, analog outputs, and current loops.

Notes:
